**Important Note from Legals**

Columbia Labs grinds our flower finely before testing it as a matter of procedure. The Delta-8 distillate we infuse our flower with is a very sticky matter that gets stuck in the lab's grinder, inevitably causing THC contents on our provided lab reports to be understated relative to the product you receive. The primary purpose of the Delta-8 flower COA's that we share is to demonstrate compliance with the 0.3% Delta-9 THC limit set forth by the 2018 Farm Bill. You should be cautious not to lose Delta-8 Distillate to your own grinder when preparing our products for enjoyment.
